Service Summary:

Service Level 1

Service Level 1 is an approved inspection program for standby generator sets to be performed semi-annually by a qualified Caterpillar Dealer Service Technician.

Inspect and/or Check:

- ✓ Overall condition of unit
- ✓ Cooling system
- ✓ Fuel system
- ✓ Air induction and exhaust system
- ✓ Lubricating oil system, scheduled oil sampling (SOS)
- ✓ Starting system
- ✓ Engine safety controls
- ✓ Generator
- ✓ Control panel
- ✓ Automatic transfer switch
- ✓ Battery annunciation
- ✓ Operation of engine & generator

Parts /Fluids:

- ✓ Includes only gaskets or seals made unusable during inspection

Service Level 2

Service level 2 is an approved inspection and preventive maintenance program for standby generator sets to be performed annually by a qualified caterpillar dealer service technician.

Inspect and / or Check:

- ✓ Overall condition of unit
- ✓ Cooling system
- ✓ Air induction and exhaust system
- ✓ Lubricating oil system, scheduled oil sampling (SOS)
- ✓ Starting system
- ✓ Engine safety controls
- ✓ Generator
- ✓ Control panel
- ✓ Automatic transfer switch
- ✓ Battery charger
- ✓ Remote annunciation
- ✓ Operation of engine & generator

Maintenance:

- ✓ Fuel system-replace engine fuel filters
- ✓ Lube oil system-change crankcase oil and oil filters, extract oil sample for analysis, and clean crankcase breather
- ✓ Air induction and exhaust systems, and inspect turbocharger
- ✓ Engine safety controls
- ✓ Generator- lubricate bearing and inspect
- ✓ Control panel- inspect, vacuum, and clean

Parts / Fluids:

- ✓ Includes engine oil analysis (SOS), lubricating oil, fuel and filters, coolant conditioner additive, makeup coolant, and gaskets or seals made unusable during preventive maintenance service. Air filter element(s) are NOT included and will be added separately if replacement becomes necessary. All waste materials and fluids are disposed of in accordance with local regulations.

Service Level 3

Service level 3 is an approved inspection, preventive maintenance, and system conditioning program for standby generator sets to be performed tri-annually by a qualified Caterpillar Dealer Service Technician.

Inspect and / or Check:

- ✓ Overall condition of unit
- ✓ Cooling system
- ✓ Air induction and exhaust system
- ✓ Lubricating oil system, scheduled oil sampling (SOS)
- ✓ Starting system
- ✓ Engine safety controls
- ✓ Generator
- ✓ Control panel
- ✓ Automatic transfer switch
- ✓ Battery charger
- ✓ Remote annunciation
- ✓ Operation of engine & generator
- ✓ Fuel system

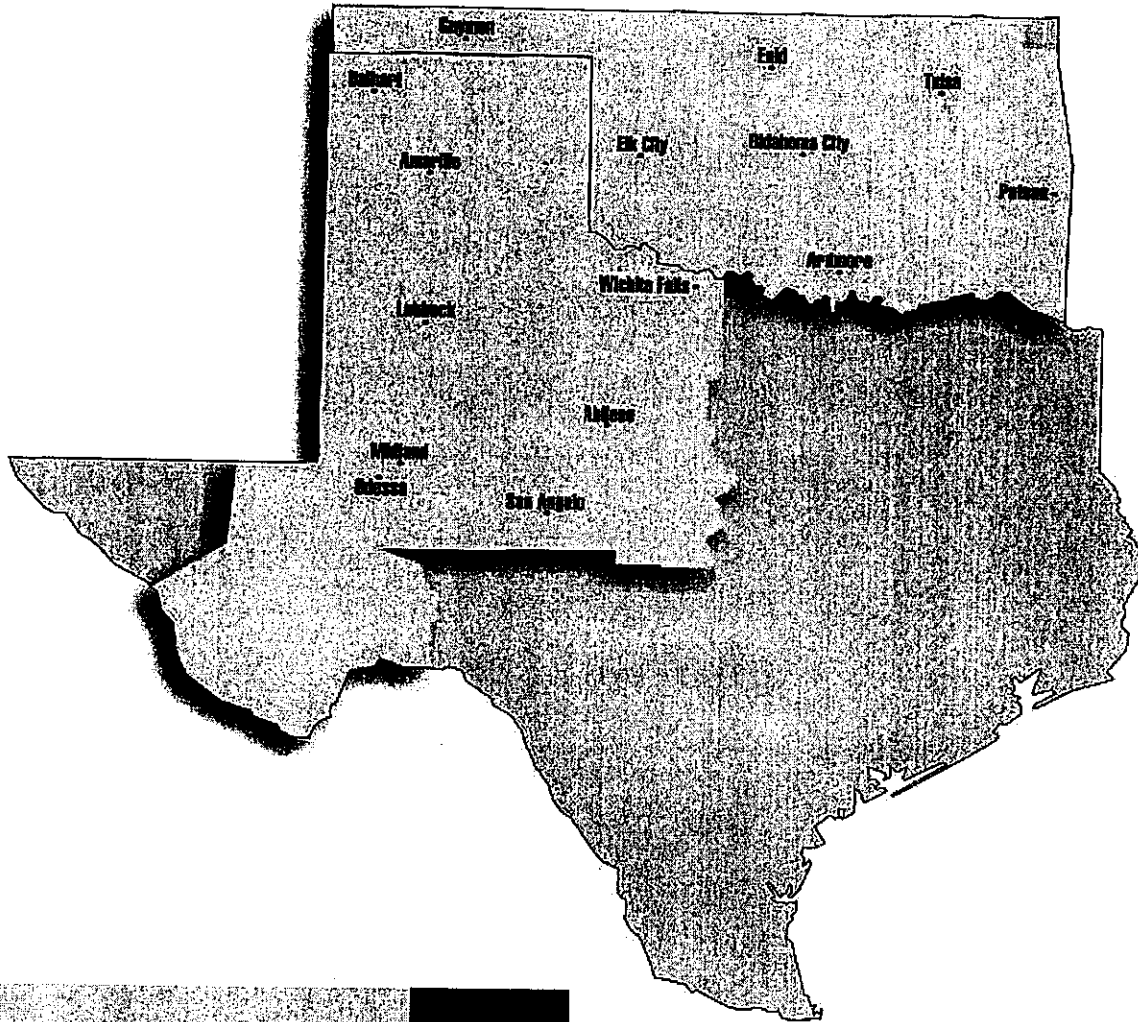

Maintenance:

- ✓ Fuel system-replace engine fuel filters
- ✓ Lube oil system-change crankcase oil and oil filters, extract oil sample for analysis, and clean crankcase breather
- ✓ Air induction and exhaust systems-check valve adjustment, check valve rotators, and inspect turbocharger, replace oil filter(s)
- ✓ Engine safety controls-check gauges, switches and wiring
- ✓ Generator- lubricate bearing and inspect
- ✓ Control panel- inspect, vacuum, and clean
- ✓ Cooling system-drain, flush, refill coolant, replace fan belts, replace coolant thermostats and seals
- ✓ Starting system – replace batteries and alternator belt

Parts / Fluids:

- ✓ Includes engine oil analysis (SOS), lubricating oil, fuel/oil/air filters, 50/50 antifreeze coolant, batteries and cables, fan belts, coolant hoses, thermostats, gaskets or seals made unusable during preventive maintenance service. All waste materials and fluids are disposed of in accordance with local regulations.
