

LIST OF TRANSPORTATION INFRASTRUCTURE PROJECTS (Prioritized List)

Make sure to prioritize your county's projects and put them in order of most importance to least importance. Total project cost will equal the total grant as reflected in the application (including engineering, right-of-way and utility costs, construction, inspection, etc., as applicable).

COUNTY: CLAY
 Choose county from drop down menu
 TxDOT District: Wichita Falls

Economically Disadvantaged: No
 If your county is an "economically disadvantaged county" as determined by Transportation Code 222.053, the State Share will be 90% of the allowable Total Project Cost. If your county is not "economically disadvantaged," the State Share will be 80%.
 Upon selection of county name from drop down list, economically disadvantaged status populates automatically. A list of economically disadvantaged counties can be found at <http://dot.state.tx.us/pub/rdot/ppd/cilt/2020/lec.pdf>.

Project Priority Number	Roadway Name or Designation	Project Limits	Scope / Type of Work	EXISTING ROADWAY		IMPLEMENTATION SCHEDULE		ESTIMATE			FUNDING			
				Type of Facility	Existing Surface	Competitive Bid or County Forces?	Proposed Begin Construction Date (Mo./Yr.)	Proposed End Construction Date (Mo./Yr.)	Engineering	ROW/Utilities	Construction	Estimated Total Project Cost	State Share	County Share

County Name: Clay

Project Name: Halsall Road

CERTIFICATION

County Transportation Infrastructure Fund Grant Program

Environmental Permitting and Regulatory Issues

By submitting this form, signed and dated by an authorized representative of the County, the County certifies to TxDOT the following:

The County certifies that the Project consists of improving an existing county road that is part of the county road system, and the County has previously maintained that. The improvements listed in the Project may include the resurfacing and repairing of the existing county road. The County is unaware of any applicable federal, state, and local environmental laws and regulations that would require permits for the Project. Further, the County has no requirement for coordination and environmental clearance for the Project. The County has not identified any environmental problems associated with the Project that require costs for mitigation and/or remediation. Finally, the County is not required to provide any public meetings or public hearings for assessing and mitigating environmental issues for the Project.

Environmental Permitting and Regulatory Issues

By submitting this form, signed and dated by an authorized representative of the County, the County certifies to TxDOT the following:

The County certifies that the Project consists of improving an existing county road that is part of the county road system, and the County has previously maintained that. The improvements listed in the Project may include the resurfacing and repairing of the existing county road. The County is unaware of any applicable federal, state, and local environmental laws and regulations that would require permits for the Project. Further, the County has no requirement for coordination and environmental clearance for the Project. The County has not identified any environmental problems associated with the Project that require costs for mitigation and/or remediation. Finally, the County is not required to provide any public meetings or public hearings for assessing and mitigating environmental issues for the Project.

Environmental Permitting and Regulatory Issues

By submitting this form, signed and dated by an authorized representative of the County, the County certifies to TxDOT the following:

The County certifies that the Project consists of improving an existing county road that is part of the county road system, and the County has previously maintained that. The improvements listed in the Project may include the resurfacing and repairing of the existing county road. The County is unaware of any applicable federal, state, and local environmental laws and regulations that would require permits for the Project. Further, the County has no requirement for coordination and environmental clearance for the Project. The County has not identified any environmental problems associated with the Project that require costs for mitigation and/or remediation. Finally, the County is not required to provide any public meetings or public hearings for assessing and mitigating environmental issues for the Project.
